

MIT CS 6.00.1x

Table of Contents

Week 1

Lecture 1 – Introduction:

• Basics of Computation	1 - 1
• Types of Knowledge	1 - 2
• Basic machine architecture	1 - 4
• Programming Language Characteristics	1 - 4

Lecture 2 – Core elements of programs:

• Types of Programming Languages	2 - 1
• Objects, Expressions, Operators	2 - 2
• Variables and Naming	2 - 4
• Strings	2 - 5
• Simple Scripts	2 - 6
• Branching programs	2 - 7

Week 2

Lecture 3 – Simple algorithms:

• Iteration	3 - 1
• Guess and Check Algorithms	3 - 2
• Loop Mechanisms	3 - 4
• Floating Point Accuracy	3 - 5
• Approximation Methods	3 - 6
• Bisection Search	3 - 7
• Newton-Raphson	3 - 8

Lecture 4 – Functions:

• Creating Functions	4 - 1
• Environments	4 - 2
• Computing Powers	4 - 4
• Understanding Variable Binding	4 - 6
• How Environments Separate Variable Bindings	4 - 8
• Understanding Root Finding	4 - 11
• Modules	4 - 13

Week 3

Lecture 5 – Recursion:

• Iterative Algorithms	5 - 1
• Recursive Algorithms	5 - 2
• Using Environments to Understand Recursion	5 - 2
• Inductive Reasoning	5 - 4
• Factorial	5 - 5
• Towers of Hanoi	5 - 5
• Fibonacci	5 - 6
• Recursion on Strings	5 - 7
• Global Variables	5 - 8

Lecture 6 – Objects:

• Tuples	6 - 1
• Lists and Mutability	6 - 2
• Operations on Lists	6 - 3
• Functions as Objects	6 - 6
• Dictionaries	6 - 8

Week 4

Lecture 7 – Debugging:

• Testing and Debugging	7 - 1
• Test Suites	7 - 2
• Black Box Testing	7 - 3
• Glass Box Testing	7 - 4
• Test Drivers and Stubs	7 - 5
• Debugging Skills	7 - 6

Lecture 8 – Assertions and Exceptions

• Exceptions	8 - 1
• Error Handling	8 - 3
• Exceptions as Control Flow	8 - 5
• Assertions	8 - 6

Week 5

Lecture 9 – Efficiency and Orders of Growth

- Measuring Complexity 9 - 1
- Asymptotic Notation 9 - 3
- Complexity Classes 9 - 5
- Comparing Complexity Classes..... 9 - 9

Lecture 10 – Memory and Search

- Search Algorithms 10 - 1
- Binary Search 10 - 2
- Selection Sort 10 - 4
- Merge Sort 10 - 5
- Hasing 10 - 7

Week 6

Lecture 11 – Classes

- Classes: User Defined Types 11 - 1
- A Class Example 11 - 3
- An Environment View of Classes 11 - 5
- Adding Methods to Class..... 11 - 8
- Example Class: A Set of Integers 11 - 9

Lecture 12 – Object Oriented Programming

- Inheritance 12 - 1
- Using Inheritance Subclasses to Extend Behaviour 12 - 2
- Using Inheritance: Designing a Class Hierarchy..... 12 - 5
- Example: A Gradebook..... 12 - 6
- Generators 12 - 8

Week 7

Lecture 13 – Trees

- Trees Introduction 13 - 1
- Searching a Tree 13 - 3
- Decision Trees 13 - 6
- Implicit Search 13 - 9
- Overgrown Trees 13 - 10
