## L1 PROBLEM 1 (3.75/5 points)

1.	What is the	difference	between	an Algorithm	and a	Program?
----	-------------	------------	---------	--------------	-------	----------

- An algorithm is a conceptual idea, a program is a concrete instantiation of an algorithm.
- An algorithm is limited to mathematical operation, a program can specify all kinds of operations.
- An algorithm makes a slow program run fast.
- An algorithm deals with computer hardware, a program deals with computer software.
- 2. True or False? A computational mode of thinking means that everything can be viewed as a math problem involving numbers and formulas.
  - True
  - False X
- 3. True or False? Computer Science is the study of how to build efficient machines that run programs.
  - True
  - False
- 4. The two things every computer can do are:
  - Perform calculations
  - Convert electricity to numbers
  - Display results to a screen
  - Remember the results

EdX is a non-profit created by founding partners Harvard and MIT whose mission is to bring the best of higher education to students of all ages anywhere in the world, wherever there is Internet access. EdX's free online MOOCs are interactive and subjects include computer science, public health, and artificial intelligence.
